Safety....

Being accurate.....

Hansa Safety Services has two state of the art Instrument Calibration Workshops.

Located in the key Ports of Hamburg and Rotterdam, we can service all your instruments to requirement.

Service as per Customer Requirements

Hansa Safety Services can provide you with calibration services as per your requirements. If you require a quick in-port calibration or your need is a fleet covert instrument exchange program, we can offer to your needs.

- In-Port Calibration & Maintenance Services
- Fleet Agreements for UTI, Gas Detector and Calibrators
- an All Manufacturer Spare Parts Stocking System
- Tracking System for Fleet based Exchange Agreement

Temperature & Pressure Service

- Accurate Certification up to 0,01°C & 0,01% F.S.
- Temperature Calibrators : - 200°C to 850°C
- Pressure Calibrators : - 1,00 Bar to 1000 Bar
- Reference Thermometers : - 50°C to 850°C
- Reference Manometer : - 1,00 Bar to 1000 Bar

UTI Service & Maintenance

- Portable Closed / Gas-tight Gauging Units
- Portable Closed / Gas-tight Sampling Units
- Portable Restricted / Open Gauging Units
- Portable Restricted / Open Sampling Units
- Vapor Control Valves for All Applications
- Portable Oxygen Sensor Gauging Tapes
- Vapor Lock Adaptors to suits all Manufactures
- A 4-point Certified Temperature Calibration with set temperatures to suit all devices:
+/- 0,00°C - 20,00°C - 45,00°C - 75,00°C

Gas Detection Service

- Single Sensor – Personal Gas Detectors
- Multi Sensor – Personal Gas Detectors
- Single Gas – Inert Gas Detectors
- Multi Gas – Inert Gas Detectors
- Alcohol Measurement Detectors
- Calibration Gas Supplies:
 - Disposable Span Gas Cylinders like Methane, Butane, Nitrogen, H2S, Multi Mix, etc.
 - Span Gas Cylinders for Fixed Systems to suit all makers requirements.
